Focus Canada 2012

Detailed Data Tables

Field dates: November 15 – December 5, 2012

The Environics Institute for Survey Research
33 Bloor Street East, Suite 900
Toronto, Ontario M4W 3H1

Banner-Question Key

This detailed set of statistical tables shows survey results for the total general population and also by various subgroups of interest. For this table set there are three "banners" of subgroups, drawn from questions in the survey. The results have also been tested for significant differences within these subgroups. The statistical tests undertaken are an independent T-Test for means and independent Z-Test for percentages. The following key shows the questions used to create the banner subgroups and also what groups have been tested for significant differences in each of the banners.

In the tables that follow, **upper case letters** under the percentages indicate subgroup differences that are significant at the **95% level**.

Q20C.   If you lost a wallet or purse that contained $200, how likely is it to be returned with the money in it if it was found …
Would it be very likely, somewhat likely, or not at all likely?

By a police officer

Q31. I would like you to think for a moment about the taxes which people in your province pay to the federal government and about federal
spending returned to the province in the form of transfer payments, pensions, family allowance, government spending and unemployment insurance.

Generally speaking, would you say that people of your province get back more than they pay to the federal government, less than they pay,
or an amount roughly equal to what they pay the federal government?

Q40. Do you strongly agree, agree, disagree, or strongly disagree that individual Canadians should be given the right to buy private health care within Canada if they do not receive timely access to services in the public system, even if this might weaken the principle of universal access to health care for all Canadians because some people might have quicker access to services?

Q41C. Now, we would like to ask you about different ideas people have to help finance our current health care system.
How much do you support or oppose the following? Is that strongly or somewhat?

Cutting back on the types of services that are covered by our health system and currently "free" to the general public

Q46. Some experts have said that consumers should be prepared to pay more to help do their part to address climate change in Canada,
in the form of new government taxes and higher prices for certain kinds of products and services?
Do you think an additional $100 per year is a reasonable amount for an average household to pay, or do you think this amount is unreasonable?

Q47A. As you may know, British Columbia now has a tax on all carbon based fuels used by consumers and businesses in the province, as a way to encourage reductions in greenhouse gas emissions generated in the province. This tax is now 7.2 cents per litre. This tax is "revenue neutral" which means the same amount raised through this tax each year is refunded – by law – to taxpayers in the form of lower personal income and corporate taxes.

Do you strongly support, somewhat support, somewhat oppose or strongly oppose this carbon tax for B.C.?

Q47B. British Columbia now has a tax on all carbon based fuels used by consumers and businesses in the province, as a way to encourage reductions in greenhouse gas emissions generated in the province. This tax is now 7.2 cents per litre. This tax is revenue neutral" which means the same amount raised through this tax each year is refunded – by law - to taxpayers in the form of lower personal income and corporate taxes.

Would you strongly support, somewhat support, somewhat oppose or strongly oppose this type of carbon tax FOR YOUR PROVINCE?

ALL PROVINCES EXCEPT BC
